

Support for neuro-diverse people in Conwy & Denbighshire

If you are neuro-diverse* or if you are a parent or carer of an neuro-diverse person we want to hear your views

Have your say about the things that matter to you

- ✓ There are more people diagnosed as neuro-diverse. There is better understanding of autism and other neuro-diversity and the impact of being neuro-diverse.
- ❖ BUT, it can still be difficult for neuro-diverse people. Not everyone has a good understanding of what it is like to be neuro-diverse.
- ❖ Neuro-diverse people can't always get the right support or do the things they want to do. It can also be difficult sometimes as a Parent or Carer.
- We want to know about your experiences as a neuro-diverse person (or as someone who cares for a neuro-diverse person).

At Venue Cymru, you can tell us what you think by

- ✓ chatting with someone
- ✓ writing down your feedback in public for other people to see
- ✓ writing down your feedback in private
- ✓ recording what you think

STAND North Wales CIC, Conwy & Denbighshire Councils will use this information to identify how to make improvements for neuro-diverse people and their parents or carers.

These are the things we want you to tell us about...

- **GOOD STUFF - What works well?** Tell us about your positive experiences
- **GAPS - What would you like to see more of?** Tell us about the things that would help you with your own wellbeing.
- **WORRIES – what are the biggest challenges** for you as a neuro-diverse person (or as a parent or carer)? What causes problems / worries for you?
- **BARRIERS** - Is there anything that **stops you / the person you care for from taking part** in things? What can be done about this?
- **IMPROVEMENTS** - If you could **change one thing to make your community better** for you (& / or the person you support) what would it be?
- **MESSAGES** - If you could give **one message** about autism and neuro-diversity to other people, what would it be?

Come along to the Gwych room at Venue Cymru on 2nd November 2023

*Neurodiversity refers to the different ways a person's brain processes information.
